

# SZUTEST

## APPLIANCES BURNING GASEOUS FUELS & ECO-DESIGN

We are strengthening our industry with our  
accredited laboratory services...

# If the problem is certification and testing, the solution is SZUTEST

For producers the way of existing in the Turkish market and opening up to Europe is through "CE" marking. A notified body is required for "CE" marking according to the provisions of 2009/142/EC – Appliances Burning Gaseous Fuels Directive.

The principal step in "CE" marking is to perform the type analysis tests based on the Directive on Appliances Burning Gaseous Fuels and related harmonized European standards.

Both as a notified body and with its appliances burning gaseous fuels laboratory and qualified and experienced workforce, SZUTEST provides full support to producers. SZUTEST makes producers gain competitive advantage through its activities in this field with its accreditations on TS EN ISO/IEC 17020 (bodies performing inspection) and TS EN ISO/IEC 17025 (testing and calibration laboratories).
