INSTALLATION INSPECTIONS

Your uncontrolled installations are risky!

Your greatest assistants at work are your installations.
Have you got your installations inspected?

One of the major reasons of accidents in establishments is the attrition in installations. These attritions cause thousands of work-related accidents every year raising big issues for health and operating costs. That is why, the Regulation on Health and Safety Requirements in the Use of Work Equipment issued by the Ministry of Labor and Social Security on April 25, 2013, mandates inspections of installations at specific intervals.
