

SZUTEST

LIFT INSPECTIONS

CE certification and periodic inspection services for lifts...

SZUTEST is the first and only notified body of Turkey for safety components.

Regulation 2014/33/EU on Lifts has been issued to ensure lifts are put into market in a way not to impose a health and safety risk for end-users. This regulation covers lifts and lift safety components used in buildings. **It should not be forgotten that lifts transport more number of people than many other public transportation vehicles.**

OUR SERVICES

- Certification activities in the scope of 2014/33/EU Lifts Regulation
- As an A-type inspection body, periodic inspection of lifts in municipal boundaries
- Fire resistance tests of landing doors in the scope of TS EN 81-58

COMPONENT TESTS

- Speed governor tests
- Parachute brake tests
- Buffer tests
- Automatic/manual door lock tests
- Upwards brake system tests
